TREASURE ISLAND

» GETTING INTO THE ACTIVITY

Go on a quest for treasure in our pirate themed Treasure Island board game.

Print out the treasure island board. You'll need one for each group playing. Ideally there should be 4-6 children in each group. Each child will need a counter. Take it in turns to roll the dice and move the appropriate number of spaces. Be careful though, some of the spaces have hidden dangers. A leader should use the sheet with the board game to help players to navigate these special squares.

Who will be the first to make it from the ship at the bottom of the board to the treasure at the top? If you get to the treasure quickly enough, you might even have the chance to play a second time.

Virtual: Children should try to come to the session with a dice to roll when it is their turn, most boardgames have a dice inside. Show the treasure island board using screenshare and children, or a leader, can use the annotate function (as well as the eraser) to mark where they are on the board.

WHAT YOU'LL NEED

- Treasure Island Game (Printable)
- Dice
- Counters

KEEPING EVERYONE SAFE

Maintain social distancing where required.
Where a dice is shared, please ensure a hand hygiene break before and after.

START

TREASURE ISLAND

BOOM!

You've been caught in a battle and been hit by a cannonball! Move backwards 5 spaces on the map.

COIN

Roll again. If it's an even number, you should move forward that many spaces. If it's odd, move backwards that number of spaces.

COMPASS

You're lost! You haven't got a clue where you are going and you are now lost on the island. Miss your next go.

SWORD

You've trespassed on pirate land and you've now got into a sword fight. This is going to take up valuable time. Miss your next go.

LADDER & FOOTPRINTS

Well done - you've found a shortcut. This will save time and give you an advantage in the quest for the treasure. Take the shortcut up the ladder / footprints.

BARREL OF EXPLOSIVES

Take a rest on the barrel of explosives. Be careful though, if someone else rolls a 6 during their go and you are sat on the barrel, then the explosives will go off! If that happens, you'll need to move back 10 spaces.

TREASURE MAP

You've found a map! This means you can get an advantage on those around you. If you wish to, swap your playing piece with someone else higher up the board

SKULL & CROSSBONES

Danger ahead!! A skull & crossbones is never a good sign, let's get out of here fast! Move backwards 8 spaces.

DIAMOND

You've found some of the treasure, you must be getting close! Move forwards 5 spaces.
