THE MISSING NOSE

PART OF THE RED NOSE DAY THEMED PROGRAMME

▶▶ GETTING INTO THE ACTIVITY

Red Nose Day 2021 has 10 specially designed noses. Meet each of the noses and then use your observation skills to spot which nose has gone missing each time.

Download and screenshare 'The Missing Nose' PowerPoint. To begin with spend some time on the 'meet the noses' slide, finding out what each of the nose designs are and their names. Ask the group which is their favourite nose and why?

Then play the missing nose game. To do this you'll firstly show the slide with all the noses on. Give the group 30-60 seconds to memorise all the noses before clicking to the next slide. This is a 10 second countdown, which helps make the game a little bit harder. The slide will then automatically change to the next image, which will have all but one of the noses on the picture. Can the group work out which nose is missing? Ask the children to wave at the camera once they have spotted it. Later on in the game, two noses are missing each time.

Did You Know: The red noses for 2021 are plastic free for the first time. They are now made from the natural by-products of sugarcane. Comic Relief decided to make the noses plastic free after receiving letters from school children encouraging them to help the environment.
